EDUCATION

University of North Carolina at Chapel Hill

Chapel Hill, NC

B.S in Computer Science and Statistics | Dean's List | GPA: 3.82/4.00

Aug. 2023 – May 2027

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Computer Architecture, Web Development, Databases, Advanced Algorithms, iOS Development, Artificial Intelligence, Software Engineering

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/Typescript, Swift, SQL (MySQL, PostgreSQL), C, HTML/CSS

Frontend: TailwindCSS, React, TanStack Query, React Router, Next.js, SwiftUI, Jest, Cypress, Material-UI

Backend: Spring Boot, FastAPI, Django, Express.js/Node.js, SQLAlchemy, Drizzle, JUnit, TestNG, Mockito, RESTful APIS, Hibernate, Postman

Tools: Docker, AWS (ECS, S3, Lambda), Supabase, Cursor, Claude Code, Gemini API, Datadog, RabbitMQ, IntelliJ, VSCode

EXPERIENCE

Full-Stack Software Engineer Intern

May 2025 – Present

Bandwidth

Raleigh, NC

- Developed full-stack order tracking system processing **5,000+ daily requests**, reducing support tickets by **6%** using Spring Boot, React, MySQL, RESTful APIs, and Datadog monitoring
- Accelerated order submission workflows by **50%+** and improved international porting efficiency for **65+ countries** by collaborating on a React dashboard backed by Spring Boot, and RESTful APIs, following Agile methodologies
- Streamlined operational workflows for **45+ internal stakeholders** by developing a comprehensive internal holiday management tool within a microservice using Django REST and React (Typescript)
- Maintained **95%+ test coverage across 40+ production pull requests** and minimized post-deployment bugs by implementing comprehensive testing using Jest/Cypress for frontend and JUnit/TestNG/Mockito for backend
- Improved API client onboarding speed by **40%** through modernization of **10+ Spring Boot REST endpoints** to support dual JSON/XML using Jackson annotations while maintaining backward compatibility for legacy systems

Undergraduate Teaching Assistant

Aug. 2025 – Present

UNC Department of Computer Science: Modern Web Programming

Chapel Hill, NC

- Mentored 200+ students** in modern full-stack development technologies including Next.js, TypeScript, React, Supabase (PostgreSQL), and Tailwind CSS, contributing to **7% improvement in assignment grades**
- Provided **10+ hours weekly of technical support** through live debugging, Git/GitHub workflow guidance, and code reviews; maintained average office hours **wait time under 2 minutes** and **resolved 30+ student tickets**

Software Developer

Jan. 2025 – Present

App Team Carolina | Website

Chapel Hill, NC

- Automated inventory tracking for **50+ staff members** by architecting and deploying on Red Hat OpenShift using FastAPI, SQLAlchemy ORM, PostgreSQL, and Docker, implementing RESTful API design patterns
- Achieved **99/100 Lighthouse performance scores** for a client website serving **100+ active users** by solely architecting an optimized Next.js (TypeScript) + Tailwind CSS frontend from UI/UX Figma designs

Software Developer

Aug. 2023 – May 2024

Computer Science for Social Good

Chapel Hill, NC

- Centralized **10,000+ inmate records** for nonprofit by engineering Python web scraping pipeline using BeautifulSoup and Selenium to extract and normalize data from **40+ state DOC websites**
- Reduced volunteer manual data entry time by **50%+** through development of React/TypeScript dashboard with real-time status tracking and record preview functionality, backed by Flask REST API and Supabase

PROJECTS

CineSense | [Link](#) | *Swift/SwiftUI, Supabase, Gemini API*

May 2025 – Present

- Built iOS cinema discovery app with AI screenshot identification via **Google Gemini API** and an interface accessing TMDB's database of **1M+ titles**, with user profiles, friend system, and messaging via WebSockets
- Implemented **AI chatbot agent using LangChain** for natural language movie search and playlist management; engineered personalized recommendation system using pgvector embeddings and Supabase cron jobs
